Common buying questions

Question	Answer
What happens when my trial ends?	Your workflows stay visible but become read-only. Nothing runs, publishes or changes until the workspace chooses a plan.
Who can start the trial or buy?	A workspace owner or admin. Each workspace has one free trial.
Do I need APIP?	AGS Automation runs inside an APIP workspace and is a separate subscription. APIP Enterprise includes it.
Can AI act on its own?	No. A person approves publishing, and an AI step's output is checked before any HTTP call that follows.
