Common buying questions

Question	Answer
What happens when my trial ends?	Agents, goals, approved work and the audit trail stay visible and downloadable, but nothing new runs or changes until the workspace chooses a plan.
Who can start the trial or buy?	A workspace owner or admin. Each workspace has one free trial.
Do I need APIP?	No. Conductor runs in an APIP workspace and can be bought on its own; a paid APIP plan lowers the price, and APIP Enterprise includes it.
Can agents act on their own?	No. Agents only draft. A named person approves every output, and nothing is sent outside the app.
