per month, incl. 20% VAT	per year, incl. 20% VAT	Stripe secure checkout

Who it is for

A working plant where operators need to change setpoints.

What is included

- 3 sites, up to 25 devices and 1,000 tags
- 10-second acquisition, 24 months of history
- 10 cameras with frame analysis
- Supervisory commands with two-person approval
- Predictive maintenance signals on asset trends
- Shift handover pack and scheduled reports
- Everything in Monitor

Operating limits

Capability	Allowance
Sites	3
Devices	25
Tags	1,000
Acquisition	10 seconds
History	24 months
Cameras	10

Human oversight and evidence

A named person requests a command and a different owner or administrator must approve it before a gateway can collect it.

Works with APIP

SCADA for AI is a separate subscription that can operate alongside APIP. APIP Professional includes SCADA for AI supervision of AI operations; APIP Enterprise includes the Plant tier for the organisation.

Questions? Email contact@automatedgovernancesystems.com or visit agspip.app/scada-for-ai/pricing. Prices include UK VAT at 20%. AI recommends; accountable people approve operational decisions.
