- 1-second acquisition, 7 years of history
- 40 cameras with frame analysis
- MQTT/Sparkplug and OPC UA bridges
- Custom control rules and asset models
- Evidence packs mapped to ISO/IEC 42001 and ISO 31000
- Everything in Operate

Operating limits

Capability	Allowance
Sites	10
Devices	150
Tags	10,000
Acquisition	1 second
History	7 years
Cameras	40

Human oversight and evidence

Commands remain supervisory: separate request and approval, gateway collection and an append-only record preserve human oversight.

Works with APIP

SCADA for AI is a separate subscription that can operate alongside APIP. APIP Professional includes SCADA for AI supervision of AI operations; APIP Enterprise includes the Plant tier for the organisation.

Questions? Email contact@automatedgovernancesystems.com or visit agspip.app/scada-for-ai/pricing. Prices include UK VAT at 20%. AI recommends; accountable people approve operational decisions.
